

## ARE YOU DOING YOUR PART?

**GOLFERS** play a large part in determining the condition of the golf course. Please practice Good Golf to make your play even more enjoyable and to keep your hometown golf course in tip-top shape.

### — BALL MARK REPAIR —

*When a golf ball impacts the greens surface, in most cases, it leaves an indentation in the green referred to as a “ball mark.” If this ball mark is not repaired it will take up to three weeks to heal, while a PROPERLY repaired ball mark will heal in 3-4 days*

For a ball mark to heal in a timely manner it is **EXTREMELY** important that it is repaired properly according to the diagram on the right.

1

### THE 5 SECOND FIX

Use a pronged ball mark repair tool, knife, key or tee.

2

Insert it at the edges of the mark - not the middle of the depression. Bring the edges together, but don't lift the center. Try not to tear the grass.

3

Smooth the surface with a club or your foot. You're done when it's a surface you would want to putt over.
